

## Handlebar kit

The part of the Rossocromo handlebar kit are developed in order to allow the assembly of "oversize" handlebars (28,5 and 30 millimeters diameter).

At the same time they give customization and valorization the assembly area of your handlebar.

They are machined from bulk metal and are true jewels exalting attention for design and style, and allow the assembly of a Rossocromo handlebar to any model of motorbike.

**ALUMINIUM HANDLEBAR CAPS ERGAL UNIVERSAL HOOK**

**Material:** aluminium alloy

**Mounting kit:** Sign:

To link together to aluminium or carbon handlebar

Both the body and the assembly system are made in aluminium alloy with refined colours. It is possible to choose among a wide chromatic range.

The universal model can be easily assembled and is supplied with appropriate tool for serration avoiding to damage the aesthetic of the screw.

**RISERS KIT "GLOSS"**

**Material** aluminium alloy

**Mounting kit** : risers for handlebar with outer diameter 28,5 or 30 mm (see technical details)

The kit is for the bikers who want to mount handlebar with outer diameter of 28,5 millimeter, and to get at the same time a refined product both for the style and the machinings, all performed by numerical control machines from bulk material. For motorbikes with old handlebar with outer diameter of 22 millimeter, and feature by upper fork bridge with built-in lower risers, adapter kit 28,5/22 is also available. This part gives more aesthetic value to a relevant spot of the vehicle, and can perfectly suit your motorbike with its particular color solutions. Great attention is dedicated to superficial finish of the handlebars, and it is available in several colors obtained by anodization.

This part is suitable for motobikes with separated risers on the upper fork bridge . Great attention is dedicated to superficial finishes of the handlebars, with the possibility to choose among several colours.
